

Mykhailo Kucherak

Full-Stack Developer

Experienced full-stack developer specializing in Python and API development. Proficient in building secure, fast, scalable RESTful and WebSocket APIs for real-time applications. Proficient in React, TypeScript, and semantic, responsive front-end applications. Strong expertise in prototyping, performance optimization, and user-friendly interfaces, delivering robust, client-focused solutions.

Work Experience

Freelance Developer

JAN 2022 - PRESENT

- Delivered 20+ projects, including booking platforms, landing pages, real-time auction application and mini-apps.
- Developed secure, scalable RESTful and WebSocket APIs using Python and FastAPI ensuring clean, extensible code.
- Built responsive, semantic front-end interfaces with React, TypeScript for intuitive UX.
- Created mini-app "Hottabych" with gamified learning, featuring daily coding tests and progress tracking.
- Led teams, delegating tasks to designers and front-end developers for efficient collaboration.
- Managed projects end-to-end, handling timelines, budgets, and deliverables as a project manager.
- Optimized back-end performance using efficient database queries and Redis caching.

Programming Consultant (Tutor)

SEP 2023 - PRESENT

- Coached 50+ students in Python, C#, C++, Rust, JavaScript, TypeScript, and many frameworks, focusing on practical coding skills.
- Conducted hands-on sessions, guiding learners through real-world projects like chat apps and web platforms.
- Provided detailed feedback on code quality, optimization, and best practices.
